The joys of the field...

Although many people make career changes that take them into the computer field, few choose to leave it. In fact, surveys of computer professionals, especially programmers, consistently report a high level of job satisfaction. There are several reasons for this contentment. One is the challenge; most jobs in the computer industry are not routine. Another is security: Established computer professionals can usually find work. And that work pays well—you should certainly be comfortable and, if you should happen to be part of an organization that offers stock options to all employees, possibly very comfortable. The computer industry has historically been a rewarding place for women and minorities. And finally, the industry holds endless fascination, since it is always changing.

本學期評量方式:

- 1. 隨堂練習程式,一定要做完。課堂上未完成者,請於隔週上課前上傳程式碼。 請於註解加上「班級、座號、姓名、問題敘述···」。
- 2. 每單元均有回家練習作業,請務必完成。
- 3. 期中、期末測驗,各佔20%。隨堂練習與回家作業共佔60%。
